We need to clarify that we have gotten a few SDS sheets since this was originally written (still nothing comprehensive).

I suggest:

Hello Ms. Knobloch,

Thank you for contacting the Centers for Disease Control (CDC) and Prevention regarding the Ames Warehouse fire in Parkersburg, West Virginia.

CDC and the Agency for Toxic Substances and Disease Registry (ATSDR) have been coordinating our public health and emergency response efforts with U.S. Environmental Protection Agency (EPA), West Virginia and Ohio state environmental agencies and local health departments. ATSDR is reviewing available environmental data from state and federal partners as it becomes available.

ATSDR has not received comprehensive chemical information or sampling results about what was in the warehouse. Therefore, there is uncertainty about what chemicals were in the smoke/plume that were in the air. CDC/ATSDR does not have chemical information at this time on what would be causing these odors or the public health implications.

For additional information and updates, visit the Mid-Ohio Valley Health Department (MOVHD) website at www.movhd.com or Facebook page at <https://m.facebook.com/MidOhioValleyHealthDepartment>.

Hi Karl,

Kerry has requested some changes in the language below. Please let me know if you have any concerns.

Thanks,

Loretta

Hello Ms. Knobloch,

Thank you for contacting the Centers for Disease Control (CDC) and Prevention regarding the Ames Warehouse fire in Parkersburg, West Virginia.

CDC and the Agency for Toxic Substances and Disease Registry (ATSDR) have been coordinating our public health and emergency response efforts with U.S. Environmental Protection Agency (EPA), West Virginia and Ohio state environmental agencies and local health departments. ATSDR is reviewing available environmental data from state and federal partners as it becomes available. ~~We appreciate your concern and are open to supporting the state with further exposure evaluations of the general public and emergency responders.~~

ATSDR has not received safety data sheets (SDSs), comprehensive chemical information, or sampling results about what was in the warehouse. Therefore, there is uncertainty about what chemicals were in the smoke/plume that were ~~was potentially (or might still be)~~ in the air. CDC/ATSDR does not have chemical information on what would be causing these odors or the public health implications.

For additional information and updates, visit the Mid-Ohio Valley Health Department (MOVHD) website at www.movhd.com or Facebook page at <https://m.facebook.com/MidOhioValleyHealthDepartment>.
